Seize the benefits of Direct Network Connect Service from eircom UK

- Obtain your connectivity direct from eircom, owner of Ireland's only nationwide MPLS network
- Save time and money by replacing disparate networks with one, high-performance Ethernet network from one provider
- A single SLA across all sites gives true business assurance
- Benefit from a single point of contact for service, support and billing
- Utilise Quality of Service (QoS) to all UK and Irish sites if required for VoIP, video or other critical business applications
- End to end network visibility and control improves application performance
- Speeds available from 64k

Go direct with eircom UK and see what you can do

Every enterprise is seeking new ways to improve productivity and drive closer collaboration across its operations, whilst seeking to reduce costs. However, UK enterprises needing to get closer to offices in Ireland face a key challenge: how can you improve performance, when your business relies on different communications networks from various providers?

Direct Network Connect Service from eircom UK is a wires-only solution that provides network connectivity across your UK sites. It may be interconnected with eircom business IP to provide MPLS connectivity into Ireland. The service lets you manage your UK and Irish networks as if they were in a single territory. End-to-end visibility and control for your IT team lets you achieve improved levels of efficiency across your UK and Irish operations.

Discover Design Deliver

UK-Irish connectivity with the quality guarantees your business demands

Direct Network Connect Service for UK-Ireland connectivity is available at speeds from 64k. Quality of Service (QoS) is available on the network to facilitate your precise management of application performance

How does eircom UK deliver this service?

eircom UK is a virtual network operator offering a range of voice and data services to UK and Irish enterprises. In Ireland, eircom owns and operates the country's only nationwide MPLS network, eircom business IP.

Is resiliency available for the Direct Network Service?

Resiliency is available for enterprises who require diversity into sites through a variety of methods, including multiple carriers. Availability is subject to site survey.

Is UK and Ireland connectivity also available as a managed service?

eircom UK offers a range of managed services to meet your business needs.
